

Table 4

Association between uncontrolled asthma and lung-function expressed as Z-score in comparison to controlled asthma, excluding data from individuals reporting an asthma attack at the given examination

Overall association between uncontrolled asthma and lung function	Regression coefficient (95% confidence interval)	p-value
FEV1	-0.042 (-0.117; 0.033)	0.27
FVC	0.007 (-0.065; 0.079)	0.85
FEV1FVC	-0.082 (-0.158; -0.007)	0.032
